## *America Oggi la Repubblica* selects GIS for Muller Martini 227 5:1 Inserter

The Muller Martini 227 5:1 inserter was fully reconditioned, installed & commissioned by GIS, who also provided extensive operator training.

GIS SVP Bruce Barna with America Oggi Managing Director, Domenico Delli Carpini

**Norwood, New Jersey** America's daily Italian newspaper, *America Oggi la Repubblica* expanded their inserting capacity by adding a Muller Martini 227 5:1 inserting system. The newspaper purchased the inserting system from mailroom specialty company, **GIS** who was also contracted to install and commission the equipment. **GIS** will also provide operator training for all production personnel at the newspaper's Norwood, New Jersey printing facility. The Muller Martini 227 inserting system is rated to process up to 5 inserts into 1 insert jacket at speeds up to 13,000 copies per hour, and features a reject control system. **GIS** also provided operator training and a reconditioned Baldwin-Stobb Count-O-Veyor.

"We chose **GIS** for this project based upon their extensive inserting experience, the value and the complete turnkey installation and training program they offered", stated America Oggi la Repubblica managing director Domenico delli Carpini.

**GIS** has over 35 years of experience supplying the newspaper industry with mailroom equipment, parts and service, along with plant consolidation consulting and brokering services.
