

PRESS RELEASE

Adams Publishing Group of Chesapeake selects GIS X-STREAM GRIPPERS for upgrade

Following the installation of all new **GIS X-STREAM GRIPPERS** are *GIS*' Randy Seidel, APG's Acie Boyce, Regional Production Director Mike Bowen, Greg Moir and Mike Judge.

Backed by an exclusive **10-Year Warranty**, the **GIS X-STREAM GRIPPER** maintains continuous perfect product pressure from 1 to 1000 pages.

Easton, MD – To improve the efficiency of their inserting process, *Adams Publishing Group of Chesapeake* chose all new **GIS X-STREAM GRIPPERS** for their Muller Martini SLS1000. **GIS X-STREAM GRIPPERS** are the ideal replacement gripper for the Muller Martini AlphaLiner, SLS1000, SLS2000 and SLS3000 inserters. **GIS X-STREAM GRIPPERS** will not drop product throughout the processing line and feature the exclusive **10-Year Warranty**.

"We've worked with Bruce for decades so when he and Randy presented their grippers to us, we were very comfortable with their company and their product. The installation was completed during our limited downtime over one weekend, and GIS added value throughout the entire inserter. We also like the fact that these grippers are maintenance free, perform well with very thick packages and have an extended 10-year warranty", stated APG of Chesapeake's regional plant & production director, Mike Bowen. *"Our SLS runs better now than when first installed, due to all of the upgrades and tweaks that were done by GIS during the recent installation"*, added APG of Chesapeake mailroom manager, Acie Boyce. APG's order also included all new chain camming, reconditioned gripper chain, installation and commissioning.

GIS X-STREAM GRIPPERS provide perfect product pressure, reduce labor costs, increase conveyor chain life and they improve count accuracy. *"GIS X-STREAM GRIPPERS have been operating in the field now for over five years at newspapers of all sizes so it's a thoroughly time-tested and proven successful design. Based on the escalated volume of recent orders, we've quadrupled our gripper manufacturing capacity"*, stated **GIS** president and **GIS X-STREAM GRIPPER** inventor, Randy Seidel.

GIS has over 35 years of newspaper mailroom design and engineering experience, and is a global supplier of post-press equipment, parts and service. **GIS** also provides plant consolidation, consulting and mailroom equipment brokering services for newspapers and commercial printers.
