## GIS Introduces new Winlincs™ Customer Support Program

**Allentown, PA** – Based on increasing customer requests for improved inserting system service support, **GIS** developed a new **WinLincs™ Packaging Line Control System Support Program**. The new service support program supports a wide range of inserting systems, including: Muller Martini SLS1000™; Muller Martini SLS2000™; Goss NP630; Goss NP632; 1372; 1472; 2299 and all other inserters that have the WinLincs™ Control System.

*“We’re in mailrooms throughout North America and the toughest challenges facing WinLincs customers are operator training and service support, so we now offer several cost-effective service plans to keep WinLincs™ control systems operating efficiently”,* stated GIS president Randy Seidel.

***“We have Muller Martini SLS1000 and SLS2000 inserters and we’ve found the GIS WinLincs™ support program to be a cost-effective solution that has dramatically improved our operator skills, up-time and throughput”.***

- Gary Snider, The Gaston Gazette Operations Director
